

SCHOOL OF HEALTH SCIENCES (SHS)

SHS 101. Fundamentals for Success in the Health Sciences. 2 Credits.

This course enables students to develop the attributes and habits of a successful health science professional. Students practice required skills to function as a professional member of a health care team, including communication, problem-solving and personal initiative. The course introduces students to the complexity of developing and delivering health care in the United States. The class is required for all students in the School of Health Sciences.

Prerequisites: None

Offered: Every year, Fall and Spring

SHS 420. Integrative Capstone. 3 Credits.

Prerequisites: None

Offered: Every year, Fall and Spring
